The RIS sites have had a total of 634022 hits distributed over 17002 visits, down 5% and 6% respectively, since December last year. The slight increase in 'sites' could arguably be attributed to RIPE 47. Both web sites generated around 60 gigabytes of HTTP traffic, which represents the same volume as in the previous report.

Please observe that the values above also include internal use.

Comments:

 The monthly report always includes an overview of the AS numbers and prefixes used in RIS queries. This overview can roughly identify RIS query users and also help us understand how the utilities are used in the real world. AS3333 and CIDR prefix 193.0.0.0/21 are defaults in the AS Query and Prefix Query respectively, which may inflate their hit count.
