## Comments:

-----  
The list over URLs for http://www.ris.ripe.net/ gives us a good indication of which queries are used by site visitors. As usual, the Looking Glass appears to be our most popular query type followed by ASinuse. Our alpha service, myASn, ranked fourth in August. However, we should be aware that these numbers could be inflated to some degree by internal development work.

#### Comments:

-----

The monthly report always includes an overview of the AS numbers and prefixes used in RIS queries. This overview can roughly identify RIS query users and also help us understand how the utilities are used in the real world. AS3333 and CIDR prefix 193.0.0.0/21 are defaults in the AS Query and Prefix Query respectively, which may inflate their hit count.
