The RIS sites have had a total of 750919 hits during 17929 visits, down 11% and up 14% respectively, since October. The relative drop in hits could be related to 'bot' filters applied in October. It should also be considered that November has only 30 days. The web sites generated around 68 gigabytes of HTTP traffic, which represents a 14% increase in comparison to the previous report.

Please observe that the values above also include internal use.

The RIS portal, <http://www.ris.ripe.net/>, had about seven times more visits per day than <http://data.ris.ripe.net/>, our download site, which is back to the normal trend seen in reports previous to the last one. Around 2 gigabytes of RIS raw data, marginally up from the 1.8 gigabytes seen in October, were downloaded during an average day. The maximum value indicates that the daily traffic can vary to a high degree throughout the month.

Comments:

-----  
The monthly report always includes an overview of the AS numbers and prefixes used in RIS queries. This overview can roughly identify RIS query users and also help us understand how the utilities are used in the real world. AS3333 and CIDR prefix 193.0.0.0/21 are defaults in the AS Query and Prefix Query respectively, which may inflate their hit count.
